GulogGratis.dk - Ad XML Specification

Specification and examples

This document specifies the tags supported by the XML importer for Campingvogn and subcategories.

The entire XML document must be encoded in UTF-8.

Example

Example of a single ad

The following examples contains multiple ads and a single ad with all possible tags. This example is meant to motivate the overall structure of the document, hence details regarding the individual fields will be provided later in this document.

The overall structure of the document is a container tag `<ads/>` containing the individual ads. Each ad is stored in the `<ad/>` tag.

```
<?xml version="1.0" encoding="utf-8"?>
    <ads>
        <ad id="42">
            <!-- Ad details -->
        </ad>
        <ad id="1337">
            <!-- Ad details -->
        </ad>
        <ad id="4242">
            <!-- Ad details-->
        </ad>
    </ads>
```

Here the overall structure for an individual ad becomes clear. One example could be:

```
<?xml version="1.0" encoding="utf-8"?>
    <ads>
        <ad id="1234">
            <last_updated>2014-10-22T07:14:55Z</last_updated>
            <headline>Overskrift til annoncen</headline>
            <text>Tekst til annoncen</text>
            <price>19500</price>
            <price_text>Fra kr. 19.500 og op</price_text>
            <type>Sælges</type>
            <images>
                    <image>http://www.kundensdomæne.dk/annonce_1234/img1.jpg</image>
                    <image>http://www.kundensdomæne.dk/annonce_1234/img2.jpg</image>
```

```
        <image>http://www.kundensdomæne.dk/annonce_1234/img3.jpg</image>
</images>

                <model>Model (Fleetwood)</model>
                <model>Model (Tabbert)</model>
                <model>Model (TEC)</model>
                <model>Model (Sun Living)</model>
            </categoryfields>
        </ad>
    </ads>
```

One should use XML validator tools to validate that everything is escaped correctly. One of these is W3C Markup Validation Service, for unix xmllint is a good tool to check for validity.

Please note! The XML validator tools only checks if the XML is formatted correctly, hence it does not look at the structure of the document!

Ad Tags

This section contains information regarding the individual tags inside the `<ad/>` their data type, default values etc.

Please note! If any of the mandatory tags are omitted the ad will be skipped during import!

Each ad tag must contain an attribute id. This must be unique for all ads for the given export.

Please note! Ads with same id in the same XML feed will be treated as the same ad!

```
<ad id="12">...</ad>
<ad id="13">...</ad>
```

```
<ad id="14">...</ad>
<ad id="15">...</ad>
```

Last Updated

The last updated tag contains information regarding when the content of the ad was updated. This timestamp is used to determine if a newer version of the ad is available or not.

The format of the date time must be in ISO 8601.

For instance Thursday, 25-Dec-99 14:15:16 becomes 1999-12-25T14:15:16Z.

Please note! If last updated is omitted, empty or equal to a previous value the ad will not updated!

Headline

The headline is displayed on the ad view and. In some categories the headline will have the category name prepended along with some of the category fields.

Text

The text tag of the ad must contain the body of text for the ad. Line breaks must be linux type line breaks.

Price

GulogGratis.dk only supports prices that are integer DKK amounts. Hence, the prices must be given as an integer in DKK (ISO 4217). Hence all prices must be integer.

Some examples can be seen in this table:

Amount in DKK	Amount in DKK rounded
10,-	10
42.65	43
12.50	12

Price Text Optional

This field accepts a text string. This text string is shown instead of the price. An example could be: "*1.200 kr. per month*".

Type

This field is used to specify what type of ad posting this is, i.e. selling, renting or giving away an item.

Name	Value	Description
Sell	Sælges	Used to denote items up for selling.
Buy	Købes	Used to denote that the owner of the ad is interested in buying an item.
Exchange	Byttes	If the owner of the ad is interested in exchanging the item to another item.
Free of Charge	Gives væk	If the item is free of charge.

Name	Value	Description
Want To Rent	Lejes	Used to mark ads where the owner of the ad is interested in renting something.
Rent	Udlejes	This is used to denote ads where the product is not sold but rented out instead.
Other	Other	If none of the above is applicable this is used. Should **only** be used seldom.

Images Optional

The `<images/>` contains images if any available for the ad. Each image must be inside an `<image/>` where the value is an URL to either a JPEG, BMP or PNG image.

An example could be

```
<images>
    <image>http://www.example.org/ad_1/img1.jpg</image>
    <image>http://www.example.org/ad_1/img2.jpg</image>
    <image>http://www.example.org/ad_1/img3.jpg</image>
</images>
```

Link Optional

The link can be a link to the an external site showing the same item. The given link must folow the RFC 3986 and WHATWG URL Living Standard.

Please note!A link should start with `http://` or similar protocol specification.

Address Optional

This tag must be specified if another address should be used instead of the default address associated with the owner of the feed.

The address must consist of four tags: road, house number, floor and door.

Name	Tag	Description
Road	road	The name of the road where the item is located.
House number	housenumber	The number on the given road where the item is located. This can also include letters.
Floor	floor	The floor, can be left empty
Door	door	The door, can be left empty
ZIP code	zipcode	The ZIP Code
City	city	The city
Country Code	countrycode	The country code. The country code must be one specified in the ISO 3166-1 standard. Denmark is DK.

Category

This tag specifies in which category the ad should be created. The category affects which category fields and ad types are available.

The specification of a category is done by providing a link to the category on the website.

If the ad should be posted in "Campingvogne" the value of the tag should be `/camping/campingvogne` (without the `http://www.guloggratis.dk`.)

An ad cannot be created in a category that has children. This means that one cannot create an ad in "*Ejendomme*", instead we need to select a child like "*Huse*" with the URL `/ejendomme/huse/`.

Below is a list of possible categories for ads below "Campingvogn"

Please note! Ads without a valid category will not be imported!

Category	Value
Campingvogn	/camping/campingvogn

Category Fields

This tags contains data that is specific for the chosen category. This information could be the number of rooms, or if a car has automatic transmission.

The possible category fields that are currently supported for the category Campingvogn and subcategories are shown in the table.

Please note! Mandatory category fields must be provided in all ads. Other category fields may be omitted.

Name	Slug	Data type	Mandatory	Data Range and values
Sidst synet	sidst-synet	Date	No	Date as ISO 8601 string
Dobbeltseng	dobbeltseng	Checkbox	No	
Sengepladser	sengepladser	Int	No	Non-negative number
Varens stand	varens-stand	Select	No	Slidt | Defekt | Næsten som ny | Ny | God, men brugt
Fransk seng	fransk-seng	Checkbox	No	
Forsendelse	forsendelse	Select	No	Ja - sælger betaler | Ja - køber betaler | Ja - omkostningen deles | Nej
Produkttype	produkttype	Select	No	
Mærke	maerke	Select	Yes	Andet mærke | Adria | Apollo Wilk | Eifelland | Fendt | Hero Camper | Knaus | Münsterland | Rapido | Safari | Solifer | Sprite | Sterckeman | Beyerland | Cabby | Carado | Dethleffs | Hobby | Home-Car | Hymer | Kabe | Kip | LMC | Polar | RC Caravan | Seestern | Senator | Wilk | Bürstner | Camp-Let | Caravelair | Chateau | Delta | Edelweiss | Elddis | Fleetwood | Tabbert | TEC | Sun Living
Enkeltseng	enkeltseng	Checkbox	No	
Model/variant	modelvariant	Text	No	Plain text

Name	Slug	Data type	Mandatory	Data Range and values
Køjer	kojer	Checkbox	No	
Totalvægt	totalvaegt	Int	No	Non-negative number
Seng i siddegruppen	seng-i-siddegruppen	Checkbox	No	
Årgang	argang	Year	No	Year as 4 digits
Sengetyper	sengetyper	Checkbox	No	Anden type | Enkeltseng | Dobbeltseng | Seng i siddegruppen | Fransk seng | Køjer
Egenvægt	egenvaegt	Int	No	Non-negative number
Anden sengetype	anden-sengetype	Checkbox	No	
Varmekilde	varmekilde	Select	No	Andet | Aldefyr | Varmeovn | Blæservarme | Gasovn
Model (Andet mærke)	model	Select	Yes	
Model (Adria)	model	Select	Yes	
Model (Apollo Wilk)	model	Select	Yes	
Model (Eifelland)	model	Select	Yes	
Model (Fendt)	model	Select	Yes	
Model (Hero Camper)	model	Select	Yes	
Model (Knaus)	model	Select	Yes	
Model (Münsterland)	model	Select	Yes	
Model (Rapido)	model	Select	Yes	
Model (Safari)	model	Select	Yes	
Model (Solifer)	model	Select	Yes	
Model (Sprite)	model	Select	Yes	
Model (Sterckeman)	model	Select	Yes	
Model (Beyerland)	model	Select	Yes	
Model (Cabby)	model	Select	Yes	
Model (Carado)	model	Select	Yes	
Model (Dethleffs)	model	Select	Yes	

Name	Slug	Data type	Mandatory	Data Range and values
Model (Hobby)	model	Select	Yes	
Model (Home-Car)	model	Select	Yes	
Model (Hymer)	model	Select	Yes	
Model (Kabe)	model	Select	Yes	
Model (Kip)	model	Select	Yes	
Model (LMC)	model	Select	Yes	
Model (Polar)	model	Select	Yes	
Model (RC Caravan)	model	Select	Yes	
Model (Seestern)	model	Select	Yes	
Model (Senator)	model	Select	Yes	
Model (Wilk)	model	Select	Yes	
Model (Bürstner)	model	Select	Yes	
Model (Camp-Let)	model	Select	Yes	
Model (Caravelair)	model	Select	Yes	
Model (Chateau)	model	Select	Yes	
Model (Delta)	model	Select	Yes
